DIY Abortion

A leaked NHS document shows that 2 women have died in England as a result of the Government's decision to allow 'DIY abortions' after just a telephone consultation. This dangerous new regime has also led to 3 Police investigations, including one for murder. We don't know what the situation is in Scotland. I've attached the leaked document (it's [online here](#), so it's not secret). **Could you write to your MSPs about this?** Contact me if you need help with addresses, what to say etc....

GOOD NEWS this month

Victory in UK Parliament – THANK YOU for all the letter writing in recent months. Attempts to hijack the Domestic Abuse Bill resulted in a [major pro-life victory](#). Thanks for sending me all your letters, they are very useful and one MP actually commented on the "extraordinary" number of letters he was getting on this subject. WELL DONE!
